

FastShift...completed

Because migration is just the beginning

Atlassian's **FastShift program** accelerates your move to the cloud. But moving your data is only half the story. The real value comes when your teams adopt the platform, your apps work seamlessly, and your business starts reaping and maximising the benefits of the cloud.

That's where Adaptavist steps in. We don't just move you — we help you complete your cloud transformation journey.

Why Adaptavist is your partner of choice

- A trusted Atlassian Platinum Solution Partner with global expertise
- Proven, enterprise-scale migration and transformation experience
- Access to AWS migration support and funding
- A focus on people, process, and long-term value — not just the technical move

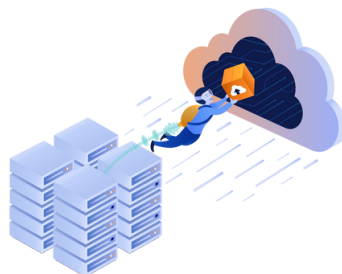

FastShift gets you to the cloud

Adaptavist makes it complete

The journey beyond migration

1. Discovery — laying the groundwork

Every journey begins with clarity. Together, we explore your business goals, review your current environment and apps, and define the benefits you want to achieve. This isn't just a technical preparation — it's setting the direction for transformation.

2. FastShift in action — the move to cloud

With Atlassian FastShift Program, migration happens faster, in structured sprints. Adaptavist brings experience and joint delivery to ensure your cloud environment is not just technically sound, but aligned to your operating needs from day one.

3. Completing the picture — apps and environment

Migration is more than moving data. Marketplace apps need conversion, integrations need testing, and teams need to adapt. We help ensure your apps run smoothly in the cloud, train your people, and create a post-migration backlog so nothing falls through the cracks.

4. Benefits realised — long-term value

The real transformation begins after the cut-over. Adaptavist supports adoption, tracks benefits, and helps you unlock new capabilities like AI, automation, data analytics, cross-platform collaboration, and scale. Migration isn't the finish line — it's the launchpad for continuous improvement.
